

LOGIQ™ E10 Series

**EMPOWERING YOU TO
MAKE THE DIFFERENCE**

gehealthcare.com

Next-generation, leadership ultrasound that adapts to your needs, today and into the future.

The LOGIQ E10 Series empowers you to make a difference in your patients' lives by supporting your expertise with next-generation, leadership ultrasound.

Choose from a wide array of advanced imaging tools and robust productivity enhancers based on artificial intelligence—all on a scalable platform that lets you configure your system specifically to the needs of your practice.

Take advantage of our most technologically-advanced ultrasound ever to bring fast, precise, consistent imaging to your patients—*your way*—with the LOGIQ E10 Series.

Confident Diagnosis

Enhance your capabilities with advanced ultrasound powered by our proven, high-performance cSound™ Architecture. The dynamic cSound Imageformer and versatile XDclear™ probes work together to deliver extraordinary image quality, so you can obtain the clarity, consistency, and confidence you need to address a wide range of clinical applications—head to toe, obese to thin, neonate to geriatric.

Liver UGAP, C1-6-D

Comprehensive Tools

The LOGIQ E10 Series provides a selection of robust tools that give clinicians a new level of confidence in their diagnostic decisions, including:

2D Shear Wave Elastography – Enables quantitative assessment of tissue elasticity. Now available with a Shear Wave Elastography Quality Indicator to support confident measurements.

Ultrasound-Guided Attenuation Parameter (UGAP) – Enables quantification of liver steatosis to aid in early identification and monitoring of patients with NAFLD, NASH or ASH.

Photo Assistant app – Acquire photos of relevant anatomy via an Android™ smart device and add them to the report with the clinical images for valuable context.

Breast mass, ML6-15-D

Concise Workflow

The LOGIQ E10 Series helps you achieve new levels of workflow efficiency, by leveraging the power of artificial intelligence.

Improve the speed and ease of exams with a choice of AI-based tools such as Auto Lesion Segmentation, OB Measurement Assistant, and Auto Doppler Assistant—and streamline workflow with productivity packages that include Scan Assistant.

The result? Fewer steps needed to achieve excellent image optimization for the entire exam—so you can spend more time focusing on patient care.

MVI plus Radiantflow™ imaging of neonatal brain, L2-9-D

> Smart Investment

Ultrasound systems for today, platform for tomorrow

The LOGIQ E10 Series is the smart choice in leadership ultrasound. Its multi-purpose versatility and scalability help you address a wide range of clinical applications and patient populations.

Our A to A digital platform is aware of and interacts with the digital ecosystem around it to provide the next level of assistance for the ultrasound user. SonoDefense, our six-layer approach to data security, helps keep your system safe and functional. And our latest digital support tools—including performance analytics, live clinical training, and advanced system diagnostics—help improve productivity.

Imagination at work

Product may not be available in all countries and regions. Full product technical specifications are available upon request. Contact a GE Healthcare Representative for more information. Please visit www.gehealthcare.com/promotional-locations.
